Dinesh Pahuja

Week01 – Day2 – Assignment

1) Multimodal
    a. Llama 4 Scout – Can extract text from Images, Can convert Text to images

Key Features and Capabilities:

Multimodal Engine: Designed for image reasoning, captioning, and visual recognition, alongside text generation.

Massive Context: Supports up to 10 million tokens, suitable for analyzing vast codebases, long documents, or extensive user data.

Efficient Architecture: As a 17B active parameter model (109B total MoE), it provides high throughput for enterprise use cases, such as on NVIDIA NIM.

Performance: Achieved 74.3 accuracy on MMLU Pro, offering high efficiency and speed, often surpassing larger models in specialized tasks.

Language Support: Supports Arabic, English, French, German, Hindi, Indonesian, Italian, Portuguese, Spanish, and Tagalog.

2) Take 3 models from -
   https://openrouter.ai/models
   Context window,Input output token cost

Service Provider	AI Chat Agent/Assistant	LLM - Large Language Modal	Context Window	Input Token Cost	Output Token Cost
Open AI	ChatGPT	GPT 5.4	1.05M	$2.50/M	$15/M
Open AI	ChatGPT	GPT 5.3	400K	$1.75/M	$14/M
Open AI	ChatGPT	GPT 4.0 mini	128K	$0.15/M	$0.60/M

3) use the Tokenizer with different prompt and see how the tokens are generated

https://platform.openai.com/tokenizer

If we use prompt as ‘write selenium code for salesforce Login’ than it is showing Token as ‘8’ so prompt is case sensitive

Likewise, if we change the Framework, Token count will change
